RE: Sanitary Sewer Repairs

Dear Resident:

The Village of Villa Park will be completing repairs to the sanitary sewer system on your street over the next several days. This construction consists of excavating the sanitary sewer main in the street and inserting a new section of pipe where the existing pipe has deteriorated. The process should be completed quickly and with minimal inconvenience to residents.

Construction is tentatively scheduled to begin tomorrow, Tuesday, July 7, 2015, and may last up to one week. Traffic on your street will be affected by construction efforts. There may be a need for temporary road closures during the workday as equipment and materials move throughout the project area. Access to properties' driveways may also be restricted for periods of time if work is taking place in front of those particular properties. Rest assured, we expect these inconveniences to be minimal, and all residents should have access to their driveways at the end of the day and overnight.

These sewer repairs are being completed in advance of proposed referendum-funded street improvements which are scheduled to take place later this summer. Those street improvements have been bid, and the Village is currently working to award a contract. Additional information regarding the street improvements will be provided as we get closer to the start of construction.

The contractor for the sewer repairs is John Neri Construction Company, Inc. All questions and comments regarding this project should be directed to the Village of Villa Park Engineering Division at (630) 834-8505. We thank you in advance for your patience throughout the course of this work. If you have any questions or would like additional information, please do not hesitate to contact us at the number listed.
