RE: 2016 Street Improvement Project

Dear Resident:

Construction of the Village of Villa Park's **2016 Street Improvement Project** is expected to begin within the next several weeks. A number of preliminary construction efforts, including construction layout, locating of underground utilities, installation of traffic control, and mobilization of materials and equipment may begin sooner, and will need to be completed before full construction operations are able to begin. These preliminary efforts should take approximately a week to complete, and full construction operations will follow.

This project generally consists of the complete reconstruction of Home Avenue. The project will also include replacement of all curb and gutter, utility structure adjustments, and any necessary restoration. More specific information for this project can be found on the Village of Villa Park's "2016 Street Improvement Project" page located at <http://www.invillapark.com/687/2016-Street-Improvement-Project>.

This project will include patching of approximately two (2) feet of driveway pavement behind the curb. If you would like to have additional driveway pavement replaced please contact the Village of Villa Park Engineering Division. If completed with the project, the unit price for asphalt replacement will be \$67.07 per square yard and the unit price for concrete replacement will be \$84.67 per square yard. If you are interested in completing this work, you must submit full payment by Friday, July 15, 2016.

Traffic on Home Avenue will be affected by construction efforts. Parking will not be permitted during the workday on streets in the project area. There may be a need for temporary road closures throughout the project as equipment or materials move in and out of the site. Access to properties' driveways may also be restricted for periods of time while work is taking place in front of those particular properties. Businesses should have access to their driveways overnight throughout most of the project, with the exception being where concrete work is taking place in or adjacent to the driveway. During this time, businesses will be allowed to park overnight on adjacent streets, where permitted. We ask that motorists follow all posted signs.

The general contractor for this project is Chicagoland Paving Contractors, of Lake Zurich, Illinois. All questions and comments regarding this project should be directed to the Village of Villa Park Engineering Division at (630) 834-8505. We will make every attempt to keep you informed of construction progress and activities, and thank you in advance for your patience throughout the course of this project. If you have any questions or would like additional information, please do not hesitate to contact us.
