RE: 2018 ADA Sidewalk Improvement Project

Dear Resident:

Construction of the Village of Villa Park's **2018 ADA Sidewalk Improvement Project** is tentatively expected to begin late in the week of May 14, 2018. A number of preliminary construction efforts, including construction layout, locating of underground utilities, installation of traffic control, and mobilization may begin sooner. These preliminary efforts may take several days to complete, and full construction operations will follow.

This project consists of the reconstruction of sidewalk ramps at 14 intersections located along Lincoln Avenue from Terrace Street to Roy Drive, at Ridge Road and Roy Drive, both ends of Hugo Court, Mission Avenue from Pleasant Avenue to Terrace Street. The replacement of deteriorated curb sections and the adjustment of existing utility structures are also included. More specific information for this project can be found on the Village of Villa Park's "2018 ADA Sidewalk Improvement Project" page located at <https://www.invillapark.com/775/2018-ADA-Sidewalk-Improvement-Project>

Traffic in the project area will be affected by construction efforts. Parking will not be permitted around work sites during the work day. There may be a need for temporary road closures throughout the area as equipment or materials move in and out of the site. Access to properties' driveways may also be restricted for extended periods of time while work is taking place in front of those particular properties. We ask that motorists follow all posted signs.

The general contractor for this project is A Lamp Concrete Contractors, Inc., of Schaumburg, Illinois. The Village will have a consultant on site full-time through the project to help coordinate construction. All questions and comments regarding this project should be directed to the Village of Villa Park Engineering Division at (630) 834-8505. We will make every attempt to keep you informed of construction progress and activities, and thank you in advance for your patience throughout the course of this project. If you have any questions or would like additional information, please do not hesitate to contact us.
