

## THE FOLLOWING CLASSES ARE OFFERED BY DISCOVERY LANGUAGE PROGRAM

### **NEW** Discover Language

Learning a new language is always an exciting adventure, a real “Discovery” of a whole new world and the people in it. Children are most receptive to foreign language learning between birth and age twelve. The earlier a foreign language is introduced, the more easily a greater level of understanding and fluency is achieved. Children succeed when they have routine and structure. Language acquisition increases when children are able to take risks and experiment with language and that happens when they are in a safe and comfortable environment. The DLP Curriculum creates this by providing a consistent routine and structure. Students can predict what is going to happen next, and they know what is expected of them.

## THE FOLLOWING CLASSES ARE OFFERED BY ROBOTHINK

### RoboThink Soccer Bot Workshop

Build a robot and play an exciting game of robot soccer in this entertaining workshop! Our lesson plans are built around RoboThink's innovative kits, plans and STEM curriculum, designed by teachers and engineers. The activities are interactive, hands-on and engaging to promote learning in a fun way. No prior experience required.

**AGES:** 6-12

**\$35 1 CLASS**

**HERITAGE CENTER, 1S325 ARDMORE AVE., VILLA PARK**

YHS43-34	Sa	10 am-12 noon	Feb 1
----------	----	---------------	-------

### RoboThink Seeing Eye Robot Workshop

Can a robot see? Ours can! Now you can build your own infra-red sensor robots! Have fun as you learn how to build robots that use IR sensors, then engage them in robotics challenges. Our lesson plans are built around RoboThink's innovative kits and STEM curriculum. The activities are interactive, hands-on and engaging to promote learning in a fun way. No prior experience required. There are different curricula to adjust for different experience levels.

**AGES:** 6-12

**\$35 1 CLASS**

### RoboThink Family Battle Royale Workshop

Have fun with your family and learn how to build robots, then battle your creations against other robots in our exciting workshop! Price is based on a team of two consisting of one adult and one child up to 12 years of age. Build your own robot equipped with RoboThink's innovative robotics kit, which includes motors, switches, axles and gears. Towards the end of the event, each team will be battling their robots in a battle royale. Our lesson plans are built around RoboThink's innovative kits, plans and STEM curriculum. The activities are interactive, hands-on and engaging to promote learning in a fun way!

## THE FOLLOWING CLASSES ARE OFFERED BY CHESS SCHOLARS

**NEW**

### Let's Build It - SNAP CIRCUITS: CRAZY CIRCUITS!

Crazy Circuits is an exhilarating, cutting-edge area of engineering. In this unit, students will design, build and test various circuits and electronic projects. Instructors will guide students through core concepts of electrical engineering, introducing them to circuits and electrical components. Students will use hands-on projects and experiments to explore how electricity is part of our daily lives. No previous experience is necessary, just a desire to learn and build. Projects will include: a disc launcher, electronic games, musical instruments, alarms and more, along with fun-filled class activities! Each student will receive an award on the last day of the session, as well as the opportunity to earn Energy Belts to demonstrate their learned skills!

**AGES:** 6-12

**\$112 6 CLASSES**

**HERITAGE CENTER, 15325 ARDMORE AVE., VILLA PARK**

YHS33-30 Tu 6-7 pm Feb 4-Mar 10

**NEW**

### Let's Build It CHAIN REACTIONS: READY, SET, ROLL!

See the laws of motion at work in this thrilling, hands-on course. Both new and returning participants are welcome. Students will construct machines, like the Heavyweight Hammer and the Spin-o-Matic, and then combine them to create exciting chain reactions! Each week, the chain reactions will become more complex with the introduction of new machines. The projects will afford students the opportunity to delve into concepts such as force, gravity, velocity, types of energy and balance. At the end of the session, students will be challenged to create the Ultimate Chain Reaction by working cooperatively to see how many machines they can incorporate. No previous experience is necessary, just a desire to learn and build. Each participant will receive an award on the last day of the session and have the opportunity to earn Energy Belts by demonstrating their learned skills!

## THE FOLLOWING CLASSES ARE OFFERED BY AFTERSCHOOL ENRICHMENT SOLUTIONS

### Smart Start Art - AROUND THE WORLD

"Every child is an artist" - Pablo Picasso. Explore your artistic side with Smart Start Art from Afterschool Enrichment Solutions. Strap on your backpack as we take a virtual trip around the world and encounter international art! Discover your creativity and imagination as an artist, developing fine motor skills, style and vision as we explore different artistic techniques through a variety of inspiring projects. Sketch and draw, shade and color, cut, glue, fold... create! See your imagination come to life! Learn about great artists from throughout history and the present day, through a weekly featured artist and fun, exciting games. Earn ArtBelts™ as you learn and progress. No experience necessary.

YHS46-31 Tu 5-6 pm Mar 31-May 5

### Guitar Stars - READY TO ROCK

"Music can change the world" - Bono. Learn the fundamentals of guitar while playing games, making music and having fun in this newly designed class from Afterschool Enrichment! We'll cover the basics, from how to hold the guitar and pick to proper fret-hand finger positioning. More advanced or returning students will delve into sight reading, playing by ear and rocking out as a class! Each child will have the opportunity to earn Guitar Belts as they progress. Note: GUITAR REQUIRED.

A basic inexpensive guitar can be purchased through Amazon.com by searching for First Act FG127.

New students will need to purchase a guitar book for \$15.

## Did you know???

We offer Magic & Balloon Birthday Parties through Gary Kantor!

For more information, please email Mikie at MKudelas@invillapark.com

## THE FOLLOWING CLASSES ARE OFFERED BY BRICKS 4 KIDZ

### LEGO® Engineering Workshop WORLD OF AMUSEMENT!

Who says physics is boring? Test out some of Sir Isaac Newton's Laws of Motion with amusement park models that illustrate the concepts of inertia, force, mass, acceleration, centrifugal force and the observation that every action has an equal and opposite reaction. Introduce kids to physics by explaining terms like inertia and mass using simple words. Bricks 4 Kidz lessons give students a foundation for understanding concepts that they will delve deeper into in years to come. Students will use our proprietary kits and step-by-step model plans to construct motorized moving models! Our exciting one-of-a-kind models incorporate beams, gears, axles, motors, battery packs and other technic LEGO® components. Students will have a blast constructing amazing amusement park rides like a ferris wheel, merry-go-round and carousel swing in this exciting Bricks 4 Kidz program! Please join us as we learn, build and play with LEGO® bricks!

YHS23-30      Th      5:30-7:30 pm      Feb 6

### Jr. Robotics & Coding Workshop with LEGO® WeDo 2.0

Coding is an important part of 21st century learning. Our Bricks 4 Kidz® Junior Robotics workshop offers all the fun of engineering with LEGO® Bricks, plus the challenge of computer programming! LEGO Education's WeDo 2.0 is a drag-and-drop, icon-based software that introduces kids to the world of wireless computer coding and robotics. This will equip children with the experiences they need to succeed in a technology-based marketplace. The updated WeDo 2.0 software allows your child to bring our proprietary Bricks 4 Kidz® models to life wirelessly, using Bluetooth communication via the 2.0 Smart Hub. This fun, action-packed enrichment program combines practical technology skills with endless fun for kids!

### NEW LEGO® STEM Workshop REMOTE CONTROL MANIA!

Making it move is the name of the game in this exciting program! Kids will love to see their creations in motion using LEGO wireless remote controls. We will use fascinating and challenging LEGO components including gears, beams, motors and battery packs to create dynamic motorized LEGO® machines! As they enjoy the fun of building, students will understand the basic working principles of many ingenious devices that are part of our everyday lives. This program is loads of fun and learning for budding builders.
