

Use a RAIN BARREL to Preserve Every Drop

Harvest rainwater for all your outdoor water needs!

A rain barrel is simply a large container used to capture rain water so you can use it on your plants, gardens, yard, and even your car!

Why Use a Rain Barrel?

- ◆ **Good for You** - Save \$\$\$! Lower water and sewage bills by using FREE rainwater
- ◆ **Good For the Environment** - Reduce stormwater runoff (*and associated pollutants*) into local rivers and streams
- ◆ **Good for Gardens** - Soft, chlorine-free water for greener gardens — plants prefer rain water!
