RE: 2016 Street Improvement Project

Dear Resident:

The Village of Villa Park will be completing road improvements on Monroe Street over the next few weeks as a part of its **2016 Street Improvement Project**. This work includes the full curb and gutter replacement and resurfacing of the pavement on Monroe Street from Harvard Avenue to Summit Avenue. The project is part of ongoing efforts to improve Village streets.

Construction is tentatively scheduled to begin the week of September 6, 2016, weather permitting. Preliminary construction efforts, including the installation of traffic control, mobilization of materials and equipment, and locating of underground utilities will begin first. These preliminary efforts should take a couple days to complete, and full construction operations will follow.

Traffic on Monroe Street will be affected by construction efforts. There may be a need for temporary road closures throughout the project as equipment or materials move in and out of the site. Access to properties' driveways may also be restricted for periods of time while work is taking place in front of those particular properties. Residents will have access to their driveways overnight throughout most of the project, with the exception that any necessary restoration of concrete driveway aprons will result in loss of driveway access while those restoration efforts are taking place. Residents will be allowed to park overnight on the street, where permitted, during those times. We will work with residents to keep them informed of any planned work efforts which may cause additional inconvenience.

The general contractor for this project is Chicagoland Paving Contractors, Inc., of Lake Zurich, Illinois. All questions and comments regarding this project should be directed to the Village of Villa Park Engineering Division at (630) 834-8505. We will make every attempt to keep you informed of construction progress and activities, and thank you in advance for your patience throughout the course of this project. If you have any questions or would like additional information, please do not hesitate to contact us at the number listed.
