RE: Second Avenue Combined Sewer Separation Project

Dear Resident:

The Village of Villa Park will be installing new storm sewer and the removal and replacement of the existing pavement on North Second Avenue over the next few weeks as a part of its **Second Avenue Combined Sewer Separation Project**. This work will take place from Holly Court to Division Street. The project is part of ongoing efforts to enhance and update Village infrastructure, and to separate existing combined sewer systems such as the one on North Biermann Avenue.

Construction is scheduled to begin on **September 6, 2018**, weather permitting. Preliminary construction efforts, including the installation of traffic control, mobilization of materials and equipment, locating of underground utilities, and sawcutting of the pavement will begin first, with full construction operations to follow. The new storm sewer will generally be installed in the east half of the street, with the exact location depending on the portion of the project area.

Traffic will be affected by construction efforts. There may be a need for temporary road closures throughout the project as equipment or materials move in and out of the site. Access to properties' driveways may also be restricted for periods of time while work is taking place in front of those particular properties. Residents will have access to their driveways overnight throughout most of the project, with the exception that any necessary restoration of curb and gutter, driveway aprons, and sidewalk will result in loss of driveway access while those restoration efforts are taking place. Residents will be allowed to park overnight on the street, where permitted, during those times. We will work with residents to keep them informed of any planned work efforts which may cause additional inconvenience.

The general contractor for this project is A Lamp Concrete Contractors, Inc., of Schaumburg, Illinois. All questions and comments regarding this project should be directed to the Village of Villa Park Engineering Division at (630) 834-8505. We will make every attempt to keep you informed of construction progress and activities, and thank you in advance for your patience throughout the course of this project. If you have any questions or would like additional information, please do not hesitate to contact us at the number listed.
