RE: Harvard Avenue Improvement Project (Jefferson Park to Plymouth)

Dear Resident:

As you are likely aware, construction of new concrete curb and gutter on Harvard Avenue is now complete. Preparation for paving of the preliminary layer of asphalt for the new roadway is currently underway. This preliminary paving work is tentatively scheduled to be completed on **Tuesday, June 22, 2021**.

Residents will continue to be without access to their driveways until the preliminary paving work is complete. We recognize that the previous notice that was distributed to residents stated that driveway access would be restricted for seven to ten days, and that the current schedule for preliminary paving on June 22 extends beyond that timeframe. We apologize for the prolonged inconvenience. All residents are expected to have driveway access restored by the end of the day after the preliminary paving is complete. Weather permitting, all residents should be back in their driveways by the end of the day on Tuesday.

Residents will be allowed to continue to park during the day and overnight on side streets, **where permitted**, and will also be allowed to continue to park overnight on your street, where permitted, between the hours of 5:00 PM and 6:00 AM. The Villa Park Police Department is aware of the need for this parking situation and should accommodate residents accordingly.

As always, all questions and comments regarding this project should be directed to the Engineering Division of the Village of Villa Park Public Works Department at (630) 834-8505. We thank you for your continued patience, especially during this period of the project. If you have any questions or would like additional information, please do not hesitate to contact us.
